Abbreviations used in this Document

SMTP   Simple Mail Transfer Protocol

1   Requirements

This document details all the steps required to deploy the CTX-Email-Template module.

Requirements:

- Remote Desktop Access to the Cortex Server

- Cortex v6.4 installed on the Cortex Server

- Connectivity from the Cortex Application Server to a SMTP Server

2   Import CTX-Email-Template

To deploy the CTX-Email-Template module on your Cortex system, the CTX-Email-Template Studio Package needs to be imported on your Cortex system. To do this:

- Download the CTX-Email-Template Studio Package

- Import the Studio Package in Cortex Gateway

- Ensure the relevant users have the required permissions in 'Studio Authorisation'

After this, all users in the authorised groups will be able to view and execute the subtask.
